- *The ENINPAACF is part of dangerous and antagonistic spaces towards power, so rather*

*than being a safe space, it is a space that will not allow any transgressive attitude that is not directed against power.*

- *Those who participate in the organization will not have the function of guards or policemen, we simply make each individual responsible for being able to solve any problem in relation to others, unless it is serious, he/she will be responsible for the consequences.*

*The meeting was not made to satisfy identity politics as a state agenda, so the people who are participating and will participate in the activities are because they are interested in participating and were taken into account for the experience that we think they have to contribute and not because of their status in the Olympics of the marginalized.*
